EDUCATION

BKPS College of Architecture
BArch, Architecture · 2015
Pune, India

CORE SKILLS

- Product & UX Strategy
- End-to-End Product Design
- Design Systems (light/dark)
- Interaction & Visual Design
- Information Architecture
- Usability & Heuristic Eval.
- Accessibility (WCAG)
- Cross-functional Leadership

AI & EMERGING WORKFLOWS

- AI-assisted design & prototyping
- Model Context Protocol (MCP)
- Prompt engineering for design
- Workflow automation
- Vibe coding (AI-assisted UI)
- Rapid iteration with AI tools

TOOLS

- Figma (Auto Layout, Components)
- Claude Code
- Adobe XD
- FlutterFlow
- Canva
- Git & GitHub

PROFESSIONAL SUMMARY

Product Designer with 10+ years across architecture and digital product design, now the sole designer behind a live, enterprise-scale AI SaaS platform — 300+ screens and a 100+ component design system across multiple products. I own end-to-end UX (research, IA, prototyping, high-fidelity UI) and build scalable design systems with light/dark modes to WCAG standards. I pair strong product thinking with hands-on AI tooling (MCP-based workflows, AI-assisted prototyping) to compress design-to-development cycles and turn complex requirements into intuitive products.

EXPERIENCE

UI/UX Designer — Hostin Services Pvt. Ltd. (Cloud.in)

Pune · Sep 2025 – Present

- Sole designer for Evalix.ai, a live AI-powered assessment and learning platform — owning end-to-end UX across admin and candidate portals, reporting and analytics (8 report types), and the marketing site.
- Designed 300+ screens and built a 100+ component design system (light/dark, WCAG) powering multiple products with a single, consistent visual language.
- Design end-to-end experiences for enterprise and AI-native SaaS, from research and IA through high-fidelity UI and developer handoff.
- Partner directly with engineering and stakeholders to simplify complex workflows and accelerate design-to-development.

Product / UX Designer — Tamarind Design Studio

Pune · Oct 2024 – Sep 2025

- Led user research and usability testing across EdTech and SaaS products, translating insights into prioritized design decisions.
- Designed wireframes, prototypes, and production UI that improved key user interactions across web and mobile.
- Introduced AI-assisted design and prototyping into the workflow to accelerate iteration and exploration.

Architect — Venkatramanan Associates & Other Firms

2017 – 2024

- Led architectural projects end-to-end, building deep skills in systems thinking, spatial hierarchy, and user-centered design.
- Managed stakeholder communication and complex requirements — foundations that now anchor my product design practice.

SELECTED PROJECTS

Evalix AI — Live enterprise AI assessment platform: sole design of 300+ screens, 100+ component design system, IA, 8 report types, admin & candidate portals.

MoneyMinds — Gamified financial literacy: XP & streak reward loops, mascot & brand design, research to visual design.

ShiftCare — Healthcare staff scheduling: shift board readable at a glance, conflict alerts, end-to-end UX case study.

HIGHLIGHTS

- Employee of the Quarter (Q1 2026) and Team of the Quarter (Q2 2026) — Cloud.in.
- Represented Evalix AI at the Delhi ET Education Summit.
- Second Runner-Up (3rd, global) — FNP Designathon 2025, an international UX & product design competition.
- Certified: Google UX Design; Design Thinking in the Age of AI; UX Accessibility & WCAG 2.0; AWS Sales Accreditation.
